Please provide a brief statement regarding your interest and /or qualifications for applying to serve on this advisory body.:

The Oversight Committee's functions are very important to our community residents. They want to know that their tax dollars are being spent effectively and wisely--and according to the public's needs, as well as city council priorities and direction. And overall, I want the city to succeed and get the most value for their tax dollar.

I believe I can serve the community well on this advisory body. During my years as an electronics system engineer, my tasks often included taking input from marketing and other company disciplines, as well as from public and customer surveys--and direct that input into systems and products that met those needs. I have strong listening and communication skills that should also be an asset in this position. I'm comfortable with detailed and technical discussions, and have experience working with budgets.
